**Certifications:** Six Sigma Green Belt Certified, Six Sigma Black Belt Certified

**Other:** GM enABLE System Delivery Methodology, Agile/Scrum Methodology, Source Code Management

## Relevant Experience:

### *CO2 Database SME*

May 2018 – July 2023

#### **General Motors, Warren, MI**

- Drove business value as the Application Business Owner by defining and prioritizing project requirements, engaging stakeholders for feedback, ensuring timely product releases, and facilitating cross-functional collaboration to promote continuous improvement.
- Managed data for 12 regional models, enforced data restrictions and validations, developed tools and macros to greatly improve efficiency, and published visualizations for executive management.
- Transformed a six-week competitive modeling process into a four-hour process, generating as much as 100 models into a single Excel file small enough to email, praised as best competitive models in all of GM.
- Developed a custom framework for transforming and merging large datasets in Excel, resulting in over 11 automation tools and providing training for the team. Showcased one tool at an executive meeting, which cut a five-week process down to just three minutes.
- Transitioned the team's reporting from Tableau to Power BI, established the Power BI server, created KPI reports, and led weekly meetings to review performance.
- Led lean Six Sigma projects, earning Green Belt and Black Belt certifications, and delivering measurable business improvements to General Motors.

### *Software Developer*

January 2014 – May 2018

#### **General Motors, Warren, MI**

- Rotated through key roles including Development Lead, Software Developer, Systems Developer, Business Analyst, Test Analyst, gaining comprehensive application development knowledge.
- Managed COTS application, including vendor interactions, deployments, SQL scripts, documentation, and Development Lead for internal projects utilizing SOAP API calls.
- Collaborated closely with Business and IT teams as a Business Analyst, facilitating active backlog refinement, prioritizing defects to enhance business systems, and drive efficiency.
- Attained intimate knowledge of applications as Subject Matter Expert, Managed WebLogic server configurations, applied business continuity practices, conducted failover tests, and enforced a new password policy across multiple applications.
- Contributed ten IT tools/scripts/process improvements to a massive Lotus Notes to SharePoint migration project, resulting in a 400% increase in productivity and finishing a month early.

## Education:

**Bachelor of Science in Information Technology; GPA: 3.60**

**Graduated December 2013**

*Oakland University, Rochester, MI*
